

Creativity With Precision

WEDDINGS ARE NOT JUST ABOUT celebrations of love but the gathering of the distinctive personalities to create the perfect dream wedding. As such, there is no one wedding solution that fits all couples – a concept that is logical but understood by few. Heaven's Gift is one of the rare gems that prides itself in understanding this, and in executing a wedding that exudes beauty and precision.

CAPABLE HANDS

Led by creative director Hannah Chong, the firm was founded in 2004 and boasts of a complete team of architect, designers and wedding planners who help design and create the unique experience of the wedding. They handle the gamut from staging aesthetics and wedding decorations, to creating the perfect mood with special lightings and music, and completing the wedding overall with finer touches that includes wedding stationery and intricate details. As concept planners, they are able to translate the vision of their wedding concepts to their vendors creatively and precisely, so that the final deliverables are true to the couple's original vision.

CREATIVE GENIUS

The guiding philosophy of Heaven's Gift is simple. Their inspiration for each wedding comes from the intimate connection

Hannah and team forms with the couple. To Hannah, "No detail is too minute to look into, no wedding is standard and templated, every creation and wedding experience should be unique and intricate." It is the very guiding principle that spurs the team continuously to create weddings that are extraordinary.

CREDIBLE RECORDS

Many would agree that only the best wedding planners are entrusted with overseas assignments. And it is in this area that Heaven's Gift has garnered recognition among discerning couples both locally and regionally. It boasts an impressive record of designing and managing stunning weddings internationally, at venues like the famous Como Shambhala and Atas Ombak in Bali, the Hotel Seiyo Ginza, and Roppongi Hills Club in Tokyo, and the recent Le

Meridien Fisherman's Cove in Seychelles. As a recent testament of what it could pull off in Seychelles, Heaven's Gift designed a spectacular hanging trellis measuring 400 square metres that allowed guests to dine under the stars, overlooking the fireworks in the horizons. Today, Hannah is a certified consultant in Association of Bridal Consultants in United States (the world's most highly regarded bridal association), and together with her team, they continue to create more weddings and special events in Asia. Most of their works have been featured in the media and publications across Singapore, Indonesia and the United States.
